Summary

Security researcher who has identified and responsibly disclosed vulnerabilities to 20+ organizations, including Microsoft, NASA, Ferrari, LG, Paytm, JP Morgan, and Nokia. Experienced in web and API security testing, vulnerability triage, cloud misconfiguration analysis, and exploit development using Burp Suite, Nuclei, Shodan, and custom Python automation. Focused on improving product security through real-world testing and secure development practices.

Technical Skills

Web/API Security: XSS, IDOR/BOLA, SSRF, SQLi, RCE, Auth Bypass
Tools & Recon: Burp Suite, Nuclei, Semgrep, Snyk, Subfinder, Amass, httpx, ffuf, Nmap, Shodan
Programming & Automation: Python, Bash, JavaScript
Security Areas: Application Security, Penetration Testing, API Security, Cloud Security, SAST/DAST
Concepts: OWASP Top 10, API Top 10, MITRE ATT&CK, Secure SDLC

Experience

Freelance AppSec Researcher / Bug Bounty Hunter — Bugcrowd, Remote *2024 – Present*

- Identified and responsibly disclosed vulnerabilities to Microsoft, NASA, JP Morgan, Ferrari, Nokia, IBM, and more.
- Discovered XSS, IDOR/BOLA, SSRF, and sensitive data exposure issues across multiple applications.
- Performed reconnaissance using Nmap, Subfinder, Amass, Nuclei, and ffuf.

Cybersecurity Intern — Prodigy InfoTech *Nov 2024 – Dec 2024*

- Automated vulnerability assessments using Python and drafted technical documentation.

Cybersecurity Intern — The Red Users *Nov 2024 – Dec 2024*

- Executed web security testing and reconnaissance to identify structural vulnerabilities.

Projects

CortexShield AI — Enterprise AI Immune System *Python, FastAPI, BERT*

- Built an AI threat detection system using a BERT classifier trained on 50K+ attacks.
- Achieved a 99.9% detection rate against prompt injection, RAG injection, and malicious code execution.

ZoroWAF — AI Web Application Firewall *Machine Learning*

- Engineered an ML-based WAF that automatically detects and mitigates XSS, SQLi, and SSRF.

ThreatHawk — Security Suite *Python*

- Created a suite with automated phishing detection, real-time DoS alerts, and custom endpoint monitoring.

Education

B.E. Computer Science & Engineering (IoT, Cybersecurity incl. Blockchain) — Dayananda Sagar College of Engineering *2026 – 2029*

Diploma in Computer Science — SDM Polytechnic, Ujire (CGPA 9.03) *2023 – 2026*

Certifications

Google Cybersecurity Professional Certificate · IBM Cybersecurity Analyst

Achievements

- NASA Hall of Fame and Letter of Recognition for reporting a critical bug.
- Hall of Fame recognition from Microsoft, J.P. Morgan, Nokia, IBM, Philips, GEA, and Ferrari.
- Appreciation letters from LG Electronics, Paytm, and Ideagen.
- Valid vulnerabilities reported to 20+ global companies.
